Ernie Stellings – A4A

Christopher Sickmond - SWA

Summary of Task 140 Close-Out

- Task 122 recommended tabletop exercise, leading to Task 140
- FCT met in late 2024 to consider tabletop execution and identified several concerns
 - Availability of the experts, given resource needs of operation
 - Additional support needed to develop and conduct the exercise
 - Limited automation opportunities to accommodate findings
- Execution of a tabletop not practical due to likely resource challenges and to questions around automation viability
- If CDM sees future value, recommend readdressing a tabletop exercise to tie into FMDS requirements process
