### **Course Description**

This virtual seminar-style course involves a diverse group of aviation professionals in lectures and discussions of current traffic management philosophy, as well as exploring the roles and relationships of various entities influencing the daily operation of the National Airspace System (NAS). Participants will receive informative briefings and engage in discussions with subject matter experts. The principal methods of instruction are briefings, media and interactive discussions.

**Target Audience**

This course is designed for FAA personnel, and international partners, involved with the development and/or impact of ATCSCC Traffic Management Initiatives (TMI). Candidates for this workshop may include Traffic Management Unit (TMU) personnel, Supervisory Traffic Management Coordinators (STMCs), Traffic Management Officers (TMOs), Operations Managers (OMs), Operations Supervisors (OSs), Military, weather personnel, and other personnel performing Air Traffic Flow Management related functions within the NAS.

**Location**

Zoom conference. Invite information will be provided via the welcome email.

**Class Schedule**

Wednesday, 9:00am – 3:30pm

Thursday, 9:00am – 3:30pm

**Instructors**

Seth Fowers, National Traffic Management Specialist

Melani Richter, National Traffic Management Specialist

John White, Staff Specialist
