Course Description

This seminar-style course involves a diverse group of aviation professionals in lectures and open discussions of current traffic management philosophy, as well as exploring the roles and relationships of various entities influencing the daily operation of the National Airspace System. Participants will receive informative briefings and engage in open discussions with subject matter experts, review operational scenarios, and be afforded the opportunity to visit the Air Traffic Control System Command Center operational floor for familiarization. The principal methods of instruction are lectures supplemented by hands-on lab scenarios utilizing Traffic Flow Management System (TFMS) tools and discussions.

Target Audience

This course is designed for FAA personnel involved with the development and/or impact of ATCSCC TMI initiatives. Candidates for this workshop may include TMU personnel, STMCs, TMOs, OMs, FLMs, military, weather personnel, and other personnel performing air traffic flow management related functions within the NAS.

Location

David J. Hurley Air Traffic Control System Command Center (2nd Floor "Clipper Room")
3701 Macintosh Drive
Warrenton, VA 20187

Workshop Schedule

0730-1600 Tuesday, Wednesday and Thursday. Class runs until 1600 on all three days

ATCSCC Security and Parking

You will park in the visitor's lot, sign in at the guardhouse. Non-FAA employees will receive an "Escort Required" badge. You will then be directed to the facility door to meet the POC.

Additional Information

For more information about the ATCSCC and surrounding area, including sites of interest and available dining, please visit <http://tfmlearning.faa.gov/>.
