

**Streamlined Communications**

- Centrally located at the ATO Vint Hill, VA complex, the JATOC makes coordination among the operational elements more accurate and efficient by improving the integration of the service units and leverages their capabilities as a unified force.
- The streamlined collection, processing, and dissemination of information throughout the NAS leads to shared situational awareness and real-time reporting.
- This provides accurate and timely information ATO Leadership relies on when making critical decisions.
- This improved process also enhances the interactions with external stakeholders, enabling them to strategically respond and accommodate impacted customers.
